Personal summary

I have a strong mathematical background, and I'm particularly interested in applications of mathematics in the real world. Over the last 2 years outside of my formal studies and my placement year I have been developing my knowledge and skills around machine learning as this is an area which I find extremely fascinating. I have been able to apply various techniques such as regression, classification, and clustering to solve problems and draw insights from large data sets. I have also been able to test and refine my skills in Kaggle competitions. My most recent curiosities with Machine Learning have led me to develop an interest to learn more about Quantum Computing and Decentralised Finance.

Education

Loughborough University - BSc (Hons) Mathematics with Statistics, 2:1

St. Dominics Sixth Form College - (A Levels) - Mathematics – A, Economics – A, Further Mathematics – B

Technical Skills

Hands on Python experience using Jupyter Notebooks and Google Collab to implement solutions using machine learning (Regression, Classification, Associative learning, Reinforcement Learning, Clustering, Natural Language Processing)

Experience refining and implementing Google scripts to automate simple and complex processes in google sheets

Exploratory data analysis, Data pre-processing, Model implementation, and Model evaluation on a large data set

Experience planning and developing a Convolutional neural network for Medical Image Segmentation for Coronary Artery Disease

Intermediate experience with R, Latex, Tableau and Ataccama

Data Quality Management and Implementation & experience with Metadata Management

MS Office (Excel, Word, PowerPoint)

Professional Skills

Experience with project planning and applying agile & scrum practices

Experience working in global teams and cross-functional collaboration in projects

Good knowledge of Data Management and Governance practices in a large organization

Experience applying critical thinking, troubleshooting and issue resolution skills, presenting and reporting

Experience in mentorship and onboarding

Employment History

Roche Products Ltd. – Roche is a large pharmaceutical company who identify new harmful diseases and create drugs to treat patients with these diseases

July 2024 – August 2025: Data Sciences Industrial Placement Student

Superskills Football Coaching - Superskills is a football coaching company for school children aged from 5-16.

November 2017 – September 2023: Football skills coach

TAMC Consultancy - TAMC is a consultancy focused on delivering operational excellence in the hospitality industry. Work consisted of onsite surveillance and data collection with statistical analysis of results.

August 2022 – September 2022: TAMC, Operations Analyst

July 2021 - August 2021: TAMC, Operations Analyst
